

ANNOUNCING KEPPRA® (levetiracetam) DRUG MONITORING ASSAY AT THE CLINICAL PHARMACOLOGY LAB!

Beginning July 10, 2006 we will offer a Keppra assay for Therapeutic Drug Monitoring. For the initial 2 months we will offer the test at \$50. Starting September 1, 2006 we will charge the normal price (to be determined based on feedback and requests for the test).

Requirements:

- We will need 1 ml serum or plasma (no separator tubes please)
- Does not need to be shipped on ice packs
- Please fillout submission form completely including dosing info, time of last meds and time of blood draw(s) and any other drugs in use and their levels if not testing through our lab.

We will run the test once a week, probably on Thursday. We will need to batch the samples to help keep the cost down since it is an HPLC assay. We will have results and recommendations back to you within 10 business days of receipt of sample at our lab.

Thanks and please let others know of this new assay!
