

Clinical Pharmacology Laboratory

Funding

The CPL is 100% self-supported with the exception of the Director's salary which is supported by Auburn University. Funds for the CPL are derived from the TDM and analytical services. All funds generated by CPL activities are directly used to support the laboratory and contribute substantially to the research efforts of the laboratory. In addition to self-generated funds, the CPL pursues clinical research funds through grants offered by private and other foundations that support clinical veterinary research.
