

# New Graduate Mentorship Program

The Emergency Pet Clinic is please to offer a unique opportunity to new and recent graduate Veterinarians.

We are located in San Antonio, TX near the San Antonio International Airport and close to downtown. In addition we have a satellite facility in Corpus Christi, TX. Our San Antonio facility is open 24/7/365 for emergency and critical care. In addition we provide internal medicine consults and abdominal ultrasounds with plans to add other specialty options in the near future.

## PAID 8 HR CE

All new hires are put through FAST vet CE class to learn point of care ultrasound

## SURGICAL EXPERIENCE

New graduates are supervised in surgery in order to learn to perform common abdominal emergency procedures so they can gain confidence with support.

## AMPLE BENEFITS

Moving allowance, stipend for licensing and membership dues, medical benefits, generous pet discount, 401K, PTO, uniform allowance

### Busy Case Load

Our high volume clinic provides ample opportunity to learn.

### Life Friendly Schedule

We believe in a balance between work and personal time to allow opportunity for rest and study. Scheduled shifts are 8-12 hours.

### San Antonio, TX

A great place for the outdoorsy or city dweller, located on the edge of Texas hill country. Affordable cost of living and designated by UNESCO as a 'Creative City of Gastronomy.'

The goal of the mentorship program is to provide a structured environment to develop confident clinicians. The first year of practice is an important time for Veterinarians. After completion of the program Veterinarians will be provided with a solid foundation for a long and successful career in emergency or general practice. This is a 1 year mentorship program with opportunity for contract renewal as an Associate Veterinarian. Competitive salary with potential for production incentive.

**“Our goal is to create proficient Emergency and Critical Care Veterinarians and our success rate is excellent”**

This 1 year mentorship program allows Veterinarians to be immersed in emergency medicine. New graduates are always scheduled on shift with a senior clinician dedicated to mentoring and ensuring success while allowing new graduates to maintain primary care responsibility. In addition new graduates are supervised during surgery with the goal of them becoming competent in soft tissue emergency surgeries such as C-section, pyometra, gastrotomy, enterotomy, gastropexy, and splenectomy. Further training can be pursued by rotating through our internal medicine department and can be arranged with different specialties including cardiology, surgery, neurology and ophthalmology. Group learning with all clinicians include journal club, topic, case-based and exotic rounds held monthly.

By the end of the year new graduates will be well-versed in most ECC presentations, and be proficient in typical ECC skills, procedures and surgeries. After completion of the program new graduates will be highly marketable, capable and comfortable practicing in any small animal emergency or general practice.

Interested candidates should email cover letter and resume to Dr. Leslie Bauer, Medical Director at [leslie.bauer@emergencypetclinicsat.com](mailto:leslie.bauer@emergencypetclinicsat.com)

## FOCUS ON DIDACTIC LEARNING

This mentorship program is structured with weekly didactic rounds that alternate between emergency/ critical care, internal medicine and exotics rounds. We also have monthly case based rounds and journal club that all staff doctors participate in.

Every other month an in-house CE presentation is given for credit that is open to our referral hospitals.
