

DISTINGUISHED JOY GOODWIN LECTURER
AUBURN UNIVERSITY COLLEGE OF VETERINARY MEDICINE

Dr. Louis J. Guillette, Jr.

A renowned expert in environmental toxicology, Louis J. Guillette, Jr., Ph.D., will visit the College of Veterinary Medicine as a Joy Goodwin Distinguished Speaker from March 7-9. Dr. Guillette currently holds a Professorship in Obstetrics and Gynecology and at the Howard Hughes Medical Institute as well as an endowed professorship in Marine Genomics at the Hollings Marine Laboratory, Medical University of South Carolina. He is internationally recognized for his research examining the evolution of the vertebrate reproductive system as well as the role of environmental contaminants as inducers of birth defects in various wildlife species and children. He has published over 300 peer reviewed papers and book chapters as well as edited five books. His current work examines the molecular, cellular and endocrine mechanisms associated with genital and gonadal development and contaminant-induced abnormalities in wildlife and humans.

- All are cordially invited.

Individuals and groups who desire to meet with him may contact Dr. Benson Akingbemi (4-4489 or akingbt@auburn.edu).

March 8, 2012

Research Seminar: Contaminants and the Developing Ovary: Lessons for Human Health

- **11:00 AM**
- **230 Greene Hall**

Distinguished Lecture: Wildlife as Sentinels of Human Health

- **4:00 PM**
- **Overton Auditorium**
