

The Boshell Diabetes and Metabolic Diseases Research Program at Auburn University invites you to attend . . .

Friday, March 20, 2020 • 6:30 pm

# Ellen Gustafson

## Obesity & Hunger

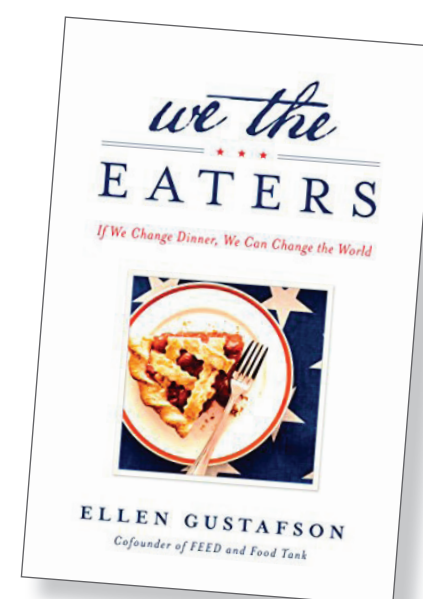

### One Global Food Issue

The Boshell Diabetes and Metabolic Diseases Research Program at Auburn University is dedicated to world-class investigation into the causes and treatment of diabetes.

The 13th Annual Research Day brings together experts from around the United States to present current topics related to diabetes and the role of obesity in its development.

**Ellen Gustafson**  
Sustainable Food System Activist  
and Author

Join us for our evening banquet at Auburn Marriott Opelika Resort & Spa at Grand National and hear guest speaker **Ellen Gustafson**, social entrepreneur, sustainable food system activist, and author of ***We the Eaters: If We Change Dinner, We Can Change the World***. Gustafson also founded **The 30 Project** — an effort to address the world’s hunger and obesity problems as a holistic global food issue. In this venture she hopes to stimulate a movement that will change our food and agricultural systems over the next 30 years so that healthy, balanced meals are available to all.
